Permission for Transportation

In the event that your child's treatment plan includes goals that involve community outing (e.g., going to the grocery store, park, library, etc.) you are granting permission for Better Options Counseling (BOC) to transport your child from one location to the other. In addition to community outings, in the event that your child seeks emergency medical care, you are granting permission for Better Options Counseling to transport your child from one location to the nearest clinic for medical care.

Prior to any transportation required, BOC will first contact the parents/guardians to inform them of the event. This may be communicated prior to starting the session or during the session via in person, phone call, email, or any written notice unless alternative plans have been made (i.e., routine community outing).

(Acknowledgment of disclosure)

I _____ (print parent/guardian name) have read the Permission for Transportation form and agree so that Better Options Counseling may transport my child to a medical center or community outing for the purposes of their treatment plan.
